

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

This Safety Data Sheet adheres to the standards and regulatory requirements of Great Britain and may not meet the regulatory requirements in other countries.

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name : Tputty™ 403

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture : For industrial use only.

1.3. Details of the supplier of the safety data sheet

Company : LAIRD s.r.o.
Prumyslova 497, Liberec, 46312, Czech Republic
Telephone : +420-488-575-111

E-mail address : laird.orders-emea@dupont.com

1.4. Emergency telephone number

+(44)-870-8200418 (CHEMTREC)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Short-term (acute) aquatic hazard, Category 1 H400: Very toxic to aquatic life.

Long-term (chronic) aquatic hazard, Category 1 H410: Very toxic to aquatic life with long lasting effects.

2.2. Label elements

Warning

H410 Very toxic to aquatic life with long lasting effects.

P273 Avoid release to the environment.
P391 Collect spillage.
P501 Dispose of contents/ container to an approved waste disposal plant.

Special labelling of certain substances and mixtures The following percentage of the mixture consists of ingredient(s) with unknown acute oral toxicity: 24.8686 %
The following percentage of the mixture consists of ingredient(s) with unknown acute dermal toxicity: 24.8686 %
The following percentage of the mixture consists of ingredient(s) with unknown

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

acute inhalation toxicity: 24.8686 %

The following percentage of the mixture consists of ingredient(s) with unknown hazards to the aquatic environment: 5.1316 %

2.3. Other hazards

Endocrine disrupting properties (human health):

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Endocrine disrupting properties (environment):

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

PBT and vPvB assessment:

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

SECTION 3: Composition/information on ingredients

3.1. Substances

Not applicable

3.2. Mixtures

Identification number	Component	Classification according to Regulation (EU) 1272/2008 (CLP)	Specific concentration limit/ M-Factors/ Acute toxicity estimate	%
CAS-No. 1314-13-2 EC-No. 215-222-5 Index-No. 030-013-00-7 REACH No. 01-2119463881-32	Zinc oxide	Aquatic Acute 1; H400 Aquatic Chronic 1; H410	M-Factors: 1[Acute] 1[Chronic] Oral ATE: > 5,000 mg/kg Inhalation ATE: > 5.7 mg/l (dust/mist) Dermal ATE: > 2,000 mg/kg	>= 30< 50 %

The above products are compliant to REACH registration obligations; Registration number(s) may not be provided because substance(s) are exempted, not yet registered under REACH or are registered under another regulatory process (biocide uses, plant protection products), etc.

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

- General advice : In the case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). First Aid responders should pay attention to self-protection and use the recommended protective clothing. Remove from exposure, lie down.
- Inhalation : Is not an expected route of exposure under normal conditions. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Keep person calm. If symptoms persist, call a physician. If unconscious, place in recovery position and get medical attention immediately. Keep respiratory tract clear.
- Skin contact : Take off contaminated clothing and shoes immediately. Wash off with soap and water. Get medical attention if irritation develops and persists. Wash contaminated clothing before reuse. Thoroughly clean shoes before reuse.
- Eye contact : If easy to do, remove contact lens, if worn. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Seek medical attention if symptoms persist.
- Ingestion : Rinse mouth. Call a physician immediately. Do NOT induce vomiting. Place unconscious person on the side in the recovery position and ensure open airways. Do not give anything by mouth to an unconscious person.

4.2. Most important symptoms and effects, both acute and delayed

- Symptoms : May irritate skin.
: May irritate eyes.
: May cause irritation of the mucous membranes.
: For further information see Section 11.

4.3. Indication of any immediate medical attention and special treatment needed

- Treatment : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. Symptoms may be delayed for several hours.

SECTION 5: Firefighting measures

5.1. Extinguishing media

- Suitable extinguishing media : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Water fog, Foam, Dry powder, Dry sand, Carbon dioxide (CO₂)
- Extinguishing media which shall not be used for safety reasons : Water spray jet

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

5.2. Special hazards arising from the substance or mixture

Specific hazards during firefighting : Material will burn. May release toxic and/or hazardous fumes and gases. Dust may form explosive mixture in air. Do not allow run-off from fire fighting to enter drains or water courses. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

5.3. Advice for firefighters

Special protective equipment for firefighters : Wear full protective clothing and self-contained breathing apparatus.

Further information : In the event of fire and/or explosion do not breathe fumes. Evacuate personnel to safe areas.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions : Keep unnecessary and unprotected personnel from entering. Wear suitable protective equipment. Refer to protective measures listed in sections 7 and 8. Control access to area. Avoid contact with the skin and the eyes. Evacuate personnel to safe areas. Ensure adequate ventilation. In case of insufficient ventilation, wear suitable respiratory equipment. Remove all sources of ignition. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. If the material is involved in a fire, or if dusts are produced, no action shall be taken involving any personal risk or without suitable training. Avoid breathing dust.

6.2. Environmental precautions

Environmental precautions : If the product contaminates rivers and lakes or drains inform respective authorities. Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Retain and dispose of contaminated wash water.

6.3. Methods and materials for containment and cleaning up

Methods for cleaning up : Sweep up or vacuum up spillage and collect in suitable container for disposal. For disposal instructions see section 13. Large spills should be collected mechanically (remove by pumping) for disposal. Eliminate all ignition sources if safe to do so. Move it to a safe place. Do not touch spilled material. Avoid dust formation. Wet wipe or vacuum up using a high efficiency particulate air (HEPA) vacuum. Use explosion proof equipment. Do not dry sweep dust accumulation.

Other information : Dispose of in accordance with local regulations.

6.4. Reference to other sections

For personal protection see section 8., For disposal instructions see section 13.

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Advice on safe handling : For personal protection see section 8. Handle in accordance with good industrial hygiene and safety practice. Provide adequate ventilation. Use personal protective equipment as required. Wash hands thoroughly after handling. Take precautionary measures against static discharges. Persons with a history of skin sensitisation problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. Avoid exposure - obtain special instructions before use. Avoid contact during pregnancy and while nursing. Do not handle until all safety precautions have been read and understood. Do not get in eyes, on skin, or on clothing. Do not ingest. Use only with adequate ventilation/personal protection. Do not breathe dust.

Advice on protection against fire and explosion : Keep away from heat and sources of ignition. No smoking.

Advice on general occupational hygiene : Wash hands before breaks and immediately after handling the product. Wash hands before eating, drinking, or smoking. Regular cleaning of equipment, work area and clothing. Wash contaminated clothing before re-use. Remove contaminated clothing and protective equipment before entering eating areas. Avoid contact with the skin and the eyes.

7.2. Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Keep in cool, dry place in original containers. Store away from incompatible materials (see Section 10). Store locked up. Store in a well-ventilated area away from heat and sunlight. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Keep tightly closed. Store in accordance with the particular national regulations.

Advice on common storage : Keep away from oxidizing agents, strongly acid or alkaline materials and amines.

Other data : Store at room temperature.

7.3. Specific end use(s)

Industrial use.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

If sub-section is empty then no values are applicable. For further information on any control parameters provided, please refer to the relevant regulation.

Components with workplace control parameters

Type Form of exposure	Control parameters (Expressed as)	Update	Regulatory basis
--------------------------	--------------------------------------	--------	------------------

Aluminum oxide (CAS-No. 1344-28-1)

Long-term exposure limit (8-hour TWA)	10 mg/m3	2011-12-01	UK. EH40 WEL - Workplace Exposure Limits
---------------------------------------	----------	------------	--

Value: 56.5 mg/kg dry weight (d.w.)
Compartment: Marine sediment

Value: 35.6 mg/kg dry weight (d.w.)
Compartment: Soil

8.2. Exposure controls

- Engineering measures : Use a local and/or general ventilation system. Local exhaust ventilation should be employed to minimize airborne contamination. Use only with adequate ventilation. Any process that has the potential to generate dust should be performed using engineering controls, such as isolation, enclosures, local exhaust ventilation, wetting with appropriate solvent, or dust collection systems, to control airborne fibers and dusts below applicable limits. Use explosion-proof electrical, ventilating and lighting equipment.
- Protective measures : Wear suitable protective equipment.
- Eye/face protection : Wear safety glasses with side shields.
Ensure that eyewash stations and safety showers are close to the workstation location.
If the work environment or activity involves dusty conditions, mists or aerosols, wear the appropriate goggles.
Equipment should conform to EN 166
- Hand protection : Material: Chemical-resistant gloves
: Material: butyl-rubber
: Material: Nitrile rubber
:
Protective gloves should be worn when the potential exists for prolonged or repeated skin contact.
:
Request information on glove permeation properties from the glove supplier.
:
Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.
:
Protective gloves complying with EN 374.
- Skin and body protection : Wear suitable protective clothing.
Wear impervious, thermal barrier/insulated clothing such as gloves, apron, boots, or whole bodysuit to prevent ANY contact with liquid or vaporizing material.
- Respiratory protection : In case of insufficient ventilation, wear suitable respiratory equipment. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
Suitable respiratory equipment: Respirator with a full face mask
Recommended Filter type: particulate prefilter
Equipment should conform to EN 14387 Equipment should conform to EN 136

TputtyTM 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

Environmental exposure controls : Soil: The product should not be allowed to enter drains, water courses or the soil.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Physical state	solid Form paste
Colour	white
Odour	no data available
Melting point/freezing point	no data available
Boiling point or initial boiling point and boiling range	no data available
Flammability	no data available
Lower explosion limit and upper explosion limit / flammability limit	no data available
Flash point	no data available
Auto-ignition temperature	no data available
Decomposition temperature	no data available
pH	no data available
Viscosity	Viscosity, kinematic no data available
Solubility(ies)	Water solubility no data available
Partition coefficient: n-octanol/water	no data available
Vapour pressure	no data available
Density and / or relative density	Density 2.5 g/cm ³
Relative vapour density	no data available
Particle characteristics	no data available

9.2. Other information

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

No other data to be specially mentioned.

SECTION 10: Stability and reactivity

- 10.1. Reactivity** : Stable at normal ambient temperature and pressure.
- 10.2. Chemical stability** : Stable at normal ambient temperature and pressure.
- 10.3. Possibility of hazardous reactions** : No dangerous reaction known under conditions of normal use.
- 10.4. Conditions to avoid** : Decomposes on heating. Avoid prolonged exposure at or above the recommended processing temperatures.
- 10.5. Incompatible materials** : Strong oxidizing agents
Strong acids
Strong bases
reactive metals
- 10.6. Hazardous decomposition products** : Carbon oxides
Boron Oxides
Nitrogen oxides (NO_x)

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity (Acute oral toxicity)

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide
LD50 / Rat : > 5,000 mg/kg
Method: OECD Test Guideline 401

Acute toxicity (Acute dermal toxicity)

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide
LD50 / Rat : > 2,000 mg/kg
Method: OECD Test Guideline 402

Acute toxicity (Acute inhalation toxicity)

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

LC50 / 4 h Rat : > 5.7 mg/l (dust/mist)
Method: OECD Test Guideline 403

Skin corrosion/irritation

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide
Rabbit
Classification: Not classified as irritant
Result: No skin irritation
Method: OECD Test Guideline 404

Serious eye damage/eye irritation

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide
Rabbit
Classification: Not classified as irritant
Result: No eye irritation
Method: OECD Test Guideline 405
Minimal effects that do not meet the threshold for classification.

Respiratory or skin sensitisation

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide
Guinea pig Maximisation Test
Classification: Does not cause skin sensitization.
Result: Does not cause skin sensitization.
Method: OECD Test Guideline 406

Germ cell mutagenicity

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide
Weight of evidence does not support classification as a germ cell mutagen. Overall weight of evidence indicates that the substance is not mutagenic.

Carcinogenicity

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

Reproductive toxicity

Not classified

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide

Toxicity to reproduction assessment:

Weight of evidence does not support classification for reproductive toxicity. Animal testing showed effects on reproduction at levels equal to or above those causing parental toxicity. Information given is based on data obtained from similar substances.

Assessment teratogenicity:

Animal testing showed no developmental toxicity.

STOT - single exposure

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide

The substance or mixture is not classified as specific target organ toxicant, single exposure.

STOT - repeated exposure

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide

The substance or mixture is not classified as specific target organ toxicant, repeated exposure.

Inhalation Rat

Exposure time: 90 d

Method: OECD Test Guideline 413

No toxicologically significant effects were found.

Skin contact Rat

Exposure time: 28 d

Method: OECD Test Guideline 410

No toxicological effects warranting significant target organ toxicity classification were seen below the recommended guidance values for classification.

Aspiration hazard

Not classified

Not classified due to lack of data. / Not classified due to data which are conclusive although insufficient for classification.

- Zinc oxide

No aspiration toxicity classification

Human experience

No human exposure data is available.

11.2. Information on other hazards

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

Endocrine disrupting properties

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

SECTION 12: Ecological information

12.1. Toxicity

Toxicity to fish

- Zinc oxide
LC50 / 96 h / Danio rerio (zebra fish): 1.55 mg/l

Toxicity to aquatic plants

- Zinc oxide
ErC50 / 72 h / Pseudokirchneriella subcapitata (green algae): 0.136 mg/l
Method: OECD Test Guideline 201

NOEC / 72 h / Pseudokirchneriella subcapitata (green algae): 0.024 mg/l
Method: OECD Test Guideline 201

Toxicity to aquatic invertebrates

- Zinc oxide
EC50 / 48 h / Daphnia magna (Water flea): 0.481 mg/l
Method: OECD Test Guideline 202

Chronic toxicity to fish

- Zinc oxide
NOEC / 32 d / Danio rerio (zebra fish): > 0.54 mg/l
Method: OECD Test Guideline 210

Chronic toxicity to aquatic Invertebrates

- Zinc oxide
NOEC / 21 d / Daphnia magna (Water flea): 0.058 mg/l

12.2. Persistence and degradability

Biodegradability

- Zinc oxide
The methods for determining biodegradability are not applicable to inorganic substances.

12.3. Bioaccumulative potential

no data available

12.4. Mobility in soil

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

no data available

12.5. Results of PBT and vPvB assessment

PBT and vPvB assessment

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

12.6. Endocrine disrupting properties

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

12.7. Other adverse effects

no data available

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Product : Dispose of in accordance with local regulations. This material and its container must be disposed of in a safe way. Dispose of contents/container to an approved waste disposal plant in accordance with local, regional and national legislations. The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Contaminated packaging : Since empty containers retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

SECTION 14: Transport information

ADR

- 14.1. UN number or ID number: 3077
14.2. UN proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (Zinc oxide)
14.3. Transport hazard class(es): 9
14.4. Packing group: III
14.5. Environmental hazards: Environmentally hazardous
14.6. Special precautions for user:
Tunnel restriction code: (-)

IATA_C

- 14.1. UN number or ID number: 3077
14.2. UN proper shipping name: Environmentally hazardous substance, solid, n.o.s. (Zinc oxide)
14.3. Transport hazard class(es): 9
14.4. Packing group: III
14.5. Environmental hazards : Environmentally hazardous

Tputty™ 403

Ref. 130000158765
Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

- 14.6. Special precautions for user:
No special precautions required.

IMDG

- 14.1. UN number or ID number: 3077
14.2. UN proper shipping name: Environmentally hazardous substance, solid, n.o.s. (Zinc oxide)
14.3. Transport hazard class(es): 9
14.4. Packing group: III
14.5. Environmental hazards : Marine pollutant
- 14.6. Special precautions for user:
No special precautions required.
- 14.7. Maritime transport in bulk according to IMO instruments
Not applicable

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Regulation (EC) No 649/2012 of the European Parliament and the Council concerning the export and import of dangerous chemicals

Not applicable

Major Accident Hazard Legislation

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving dangerous substances.

E1 ENVIRONMENTAL HAZARDS Quantity: 100 t, 200 t

Other regulations :

Take note of Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical agents at work.

Take note of Directive 94/33/EC on the protection of young people at work or stricter national regulations, where applicable.

Take note of Directive 92/85/EEC regarding maternity protection or stricter national regulations, where applicable.

Take note of Directive 2000/39/EC establishing a first list of indicative occupational exposure limit values.

15.2. Chemical safety assessment

No Chemical Safety Assessment has been carried out for this mixture.

SECTION 16: Other information

Full text of H-Statements referred to under section 3.

Version 2.0

Revision Date 15.05.2024
Issue Date 20.08.2024

Note: The classification of substances listed in Annex VI to the CLP regulation are derived from assessment of the best knowledge and information available at the time of its publication or subsequent amendments. The information on components provided in sections 11 and 12 of this safety data sheet may in some cases not align with a legally binding classification on the basis of technical progress and availability of new information.

Significant change from previous version is denoted with a double bar.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guide for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The above information relates only to the specific material(s) designated herein and may not be valid for such material(s) used in combination with any other materials or in any process or if the material is altered or processed, unless specified in the text.
